

Gutterglove[®] IceBreaker

The breakthrough technology of Gutterglove IceBreaker now makes it possible to have gutters in freezing areas of the world.

DEICING

Heated Gutter Guard: IceBreaker radiates the right amount of heat all throughout itself to melt icicles, ice dams and snow loads in the winter time with the use of a single self-regulating cable.

- A** Melts icicles and ice dams.
- B** Heat cable installs in front.
- C** Heat radiates throughout aluminum support frame.
- D** Heat radiates downward creating a warm micro-climate to melt ice inside gutter.

FILTERING

Gutter Protection System: IceBreaker keeps out leaves, pine needles, seed pods and even sand from your gutter.

- A** After all the ice melts off and spring sets in, the fine stainless steel mesh filters out leaves, pine needles and roof sand grit from your gutter.
- B** Only rainwater filters through your gutter.
- C** Anodized aluminum frame supports the mesh and channels rainwater to the gutter.
- D** Installs on existing gutters.

No more icicles, snow loads or ice dams on your gutter

Rainwater Harvesting

GO GREEN with Gutterglove

Gutterglove gutter guards are used all over North America in rain harvesting systems (RHS) and even snow and fog harvesting systems because of their filtering ability to keep leaves, pine needles and sand out of gutters and rainwater storage tanks. Each photo in this brochure is from a rain harvesting system that uses Gutterglove Gutterguard.

Photos from Los Angeles Times story titled "Rain Man: Jerry Block plans to save every drop" with his 20,000 gallon rain harvesting system that uses Gutterglove to filter all debris from his rainwater tanks.

Gutterglove[®]

Gutterguard

**Eliminate
Gutter
Cleaning
Forever™**

3 MESH-FILTERING GUTTER GUARDS TO CHOOSE FROM:

Gutterglove Pro Series

The Pro Series offers uncompromised quality and strength to work with a vast array of roof types from heavy tile to super thick asphalt shingles. It comes in **three sizes** and is designed to fit a variety of gutter sizes ranging from 2" to 7.5" and can even span to fit a 14" gutter when doubled up.

Gutterglove Ultra

Ultra is a lower cost version of the Pro Series. It was specifically designed for the homeowner with a limited budget. We sacrificed just a little strength and can still be used on most gutter and roof types.

Gutterglove IceBreaker

Gutterglove IceBreaker is a heated gutter guard that attaches to the top of your existing gutter and melts icicles, ice dams, and snow loads in the winter while continuing to filter out leaves, pine needles and sand all year long.

Gutterglove®

Gutterguard

BENEFITS:

- Keeps out leaves, pine needles and small roof sand grit from your gutter system!
- Gutter cleaning is eliminated forever!
- Fits on your existing gutter!
- Barely visible from the ground!
- 316 surgical-grade stainless steel mesh!
- Virtually maintenance free!
- Filters over 200 inches of hourly rainfall!
- #1 choice amongst rainwater harvesters!
- Hardened anodized aluminum frame!
- Lifetime Warranty!

HOW IT WORKS:

BEFORE RAINS

AFTER RAINS

Gutterglove slips easily under the shingles of your roof and securely fastens to the front lip of your gutter. It fits on any roof type and gutter type. When installed at the same pitch of your roof, virtually all debris slides off. Gutterglove is extremely rigid and won't crack, cave in your gutter or collapse over time.

Gutterglove featured on Discovery Channels "Renovation Nation", and in several TV news stories across the country on ABC, CBS, NBC, CW and FOX for its hi-tech filtering abilities.
